

Jastej Singh Sehra

UI/UX & Product Designer

@ jastejsingh98@gmail.com <https://pixelpilot.design/> <https://www.linkedin.com/in/jastej-sehra/> Vancouver, BC, Canada

SUMMARY

UI/UX and Product Designer with 6 years of experience delivering human-centered, accessible, and scalable digital products across **fintech, SaaS, e-commerce, and Web3**. Skilled in end-to-end design—from research to polished UI, component libraries, and developer handoff. Known for simplifying complex workflows, building design systems, and driving measurable product outcomes in Agile, cross-functional teams.

EXPERIENCE

Senior UI/UX & Product Designer

TD Bank

05/2022 - 07/2025 Toronto (Remote)
<https://apps.apple.com/us/app/td-bank-us/id382107453>

- Owned UI/UX across **TD's mobile banking app** (5M+ users), driving clarity, usability, and performance through a user-centered, data-driven design process.
- Led full redesigns of **transaction history, account activity screens** and **shopping** (credit cards, mortgage and loans options); improved user task success by 21% and reduced drop-off by 15%.
 - Designed secure login, verification, and account flows across mobile banking and fintech products—balancing identity assurance with smooth user experience.
 - Conducted 20+ moderated **usability tests** and iterative A/B testing to validate flows, interaction logic, and real-time feedback states.
 - Built accessible, componentized design systems (WCAG 2.1 AA) and interactive **Figma prototypes** used across 30+ Agile sprints.
 - Collaborated deeply with developers in Jira and Confluence—writing specs, conducting QA, and ensuring pixel-perfect implementation.
 - Facilitated stakeholder alignment via workshops, design reviews, and UX documentation—bridging business goals with user behavior.
 - Designed **public-facing app store visuals** (US market), contributing to a 12% uplift in listing click-through rate during major release cycles.

UI/UX Designer

TurboContent.AI

12/2023 - 04/2024 Vancouver, BC
<https://turbocontent.ai/>

- Designed a **GPT-powered SaaS platform** end-to-end—leading UX, design systems, and QA across AI writing workflows and growth surfaces.
- Led UX for an **AI content creation platform** built on the ChatGPT API, designing flows that reduced user friction by 40% across 8+ tool modules.
 - Created modular UI patterns for ad copy, blog generation, and product descriptions—each with structured inputs, editing previews, and confidence-boosting UX cues.
 - Used analytics and user feedback to identify drop-off points in multi-step flows; redesigned UX to reduce friction and improve conversion across key trust-related actions.
 - Built a **scalable light/dark design system** in Figma with tokenized components, dev notes, and edge-state behavior—improving dev speed and visual consistency.
 - Partnered with engineers in QA cycles to resolve UI regressions and polish interaction logic, cutting post-release bugs by 80%.
 - Designed the **public-facing website UI**—refining hierarchy, messaging clarity, and mobile responsiveness—leading to a 28% lift in free trial signups.
 - Extended component libraries to include edge states, alerts, and secure interaction patterns—ensuring consistent behavior across sensitive identity and authentication screens.
 - Worked directly with the CEO and developers to prioritize UX issues, using Notion and Loom to align technical constraints with user experience goals.

KEY ACHIEVEMENTS

- **Redesigned TD Bank App for 5M+ Users**

Led UI/UX modernization for core transaction flows, reducing user drop-off by 15% and cutting support tickets by 18% through usability testing and accessible design.
- **Shipped GPT-Powered SaaS with 28% Signup Lift**

Redesigned an AI content platform built on ChatGPT API; improved UX clarity and visual hierarchy, leading to a 28% increase in trial signups post-launch.
- **Launched Web3 NFT Ecosystem with Full Art + UX**

Designed the full Solana-based NFT purchase flow and character art; led QC systems that caught 100+ visual errors and aligned storytelling with product UI.
- **Boosted Crypto Checkout Conversion by 19%**

Redesigned Mobium's Fiat-Crypto flow; improved trust, KYC logic, and wallet interactions—reducing payment drop-off and bounce rates significantly.
- **Designed 300+ Creatives for Esports Growth**

Created high-converting campaign graphics and animated ads for Alphagen, driving a 45% increase in social and ad engagement across multiple tournaments.

EXPERIENCE

Product Designer

Birdseye Global

03/2022 - 07/2022 Toronto

https://birdseyepost.com/

Designed a **Shopify analytics platform** and **marketing site** from the ground up—combining data-driven UX, full product UI, and frontend-aware systems for early-stage traction.

- Translated raw founder sketches into a complete **Shopify plugin dashboard**; built data-rich UI for post-purchase insights, campaign tracking, and delivery feedback.
- Created **chart systems** (bar, heatmaps, pie) optimized for clarity and scanability—boosting dashboard feature adoption by 30% during beta onboarding.
- Designed and coded the public-facing **marketing website** using React.js and TailwindCSS—improving lead conversion by 26% post-launch.
- Built **internal pitch deck** visuals and storytelling logic used in Birdseye's investor outreach, helping communicate product value and roadmap.
- Collaborated async via Slack and Notion to scope features, map user journeys, and ensure branding remained consistent across product and web.

UI/UX Designer

GoodGamer Corp

12/2021 - 04/2022 Vancouver, BC

https://goodgamercorp.com/

Led UX, UI, and production systems for a **large-scale NFT and gaming ecosystem**—spanning **blockchain dashboards**, minting UX, creative direction, and design team leadership.

- Designed the full **NFT retail website UI** for Chosen Ones, including wallet flows, collection galleries, and Solana-based purchase interactions—cutting cart abandonment through clearer hierarchy and progressive disclosure.
- Built a **Web3 accounting dashboard** to help the finance team **track, reconcile, and convert** NFT purchases—reducing manual effort by 40% and improving reporting accuracy.
- Created high-fidelity UX flows, component libraries, and visual logic for **wallet linking, smart contract UX, and minting states**—ensuring consistency and developer feasibility.
- Designed original **character artwork** for 5 NFT hero types using Procreate and Photoshop; led the art direction for 500+ collectible variations, connecting visual storytelling to lore and community hype.
- Managed and quality-checked output from a team of 6 offshore designers—built a **QC system in Google Sheets** that flagged over 100 visual or metadata inconsistencies pre-mint.
- Delivered branded visuals for **investor presentations**, Twitter/X campaigns, and Discord reveals—boosting early waitlist engagement and collection anticipation.
- Collaborated with blockchain engineers** and PMs across Jira and Notion; annotated Figma files for edge states, loading behavior, and token usage to ensure production fidelity.

EXPERIENCE

UI/UX Designer

Mobilum

📅 06/2021 - 08/2021 📍 Remote

🔗 <https://www.mobilum.com/en>

Redesigned Mobilum's **crypto payment ecosystem** across web and mobile—owning product UI, transactional UX, and QA-to-handoff in a fast-paced fintech environment.

- Rebuilt the **Mobilum retail website UI**, improving trust signals, product navigation, and visual hierarchy—resulting in a **26% reduction in bounce rate** and increased conversions across shoppable crypto card CTAs.
- Designed and structured the **Fiat-Crypto On/Off Ramp widget**, streamlining onboarding, KYC, and wallet connection flows—**reducing user drop-off by 19%** at the payment step.
- Led UX for the **Mobilum Pay Android app** (10K+ downloads), focusing on wallet navigation, transaction flow clarity, and responsive card controls—driving a **notable drop in support tickets** around basic transaction actions.
- Delivered fully responsive Figma prototypes with WCAG 2.1-aligned accessibility, edge-case states, and variant logic. Created reusable components to scale UI consistency across web and mobile.
- Collaborated with developers via **Zeplin and Jira** to ensure pixel-perfect, on-brand execution; ran QA passes to confirm **interaction accuracy** across breakpoints.
- Used Figma, Adobe Photoshop and Illustrator to refine visual assets for product pages, while maintaining brand consistency across marketing and transactional UIs.

Game UI/UX Designer

Blackbird Interactive

📅 03/2021 - 06/2021 📍 Vancouver

🔗 <https://blackbirdinteractive.com/>

Contributed to the UI/UX design of **Minecraft Legends** (Xbox Game Studios), focusing on console-first navigation, modular systems, and brand-aligned game interface polish.

- Designed **interactive menu systems** and **HUD components** for **Minecraft Legends**, aligning layout, visual hierarchy, and control logic with Mojang's cross-platform game design standards.
- Created modular UI components and reusable layouts in Figma—optimized for controller input, accessibility, and consistent scaling across PC and console breakpoints.
- Collaborated with game designers to refine **base-level design assets** and to **build terrain overlays, environmental tiles, and functional UI assets**—improving new-player onboarding and in-game clarity.
- Conducted QA passes on interface layout behavior across build versions; ensured elements adhered to resolution constraints and platform-specific interface requirements.
- Organized UI kit references, frame libraries, and version control workflows to streamline multi-team collaboration during iterative sprints.

EXPERIENCE

UI/UX and Product Designer

Native Ads Inc

📅 04/2020 - 03/2021 📍 Vancouver, BC

🔗 <https://nativeads.com/>

Designed **crypto SaaS dashboards** and performance-first UI for **DeFi and gaming products**—owning UX strategy, component systems, and production efficiency across high-speed delivery cycles.

- Designed the full **XportDigital website and merchant dashboard UI**, improving clarity and reducing cognitive load for crypto liquidity providers and custodial account users.
- Built a **dark-mode design system** in Figma, including atomic components, naming logic, and dev documentation—accelerating frontend build speed by ~35%.
- Designed the full in-game UI for **DiceMerge**, including tutorial flow, HUD layout, scoreboards, and monetization touchpoints—optimized for mobile clarity and touch interaction.
- Delivered developer-ready specs and collaborated via Jira and Zeplin, ensuring accuracy and scalable layout logic during multi-sprint releases.
- Supported **presentations** and visual storytelling for internal strategy decks and partner pitches, helping communicate product UX strengths and differentiation.

UI/UX Designer & Frontend Developer

Alphagen Esports

📅 06/2019 - 03/2020 📍 Vancouver

Hybrid role spanning product UI/UX, frontend development, and high-volume marketing design—owning creator tools, design systems, and digital campaigns across a fast-scaling esports platform.

- Led UX and UI design for Alphagen's **creator monetization dashboard**, including earnings breakdowns, analytics, and payout tools—boosting creator satisfaction by 33% based on support ticket reduction.
- Built and maintained **responsive landing pages** using React.js and TailwindCSS; applied design logic directly in code to reduce handoff errors and shorten iteration cycles.
- Designed over **300+ graphic assets** for social campaigns, tournament countdowns, and live promotions—reinforcing brand presence across Instagram, Facebook, and Twitch.
- Created **animated ads** using After Effects and Illustrator—driving a 45% increase in paid ad engagement during peak tournament cycles.
- Delivered UI concepts and **packaging design for merch drops**, aligning brand storytelling across product, web, and physical experiences.
- Collaborated cross-functionally with marketing, dev, and brand leads to unify design systems across platform UI, emails, and influencer-facing assets.

EDUCATION

 Bachelor of Science, School of Interactive Arts & Technology + Minor in Business (Beedie School of Business)

Simon Fraser University

📅 09/2014 - 10/2019 📍 Vancouver, BC, Canada
